DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thornton*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-10 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-32 of copending Application No. 11/521,460 in view of Marchionna et al (5,723,687). Although the conflicting claims are not identical, they are not patentably distinct from each other because the conflicting claims disclose a process including two steps. The first step is used for converting isobutene to a product which is separated into a stream containing remaining isobutene. The separated stream is reacted with an alcohol in at least one reaction stage, and wherein one reaction stage of the at least one reaction

stage comprises a reactive distillation (see claims). The conflicting claim does not disclose that the first step of conversion isobutene is an oligomerization. However, Marchionna discloses a joint production of oligomers of isobutene and MTBE (the abstract: col. 2, lines 38-44). It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the conflicting process by oligomerization of isobutene in the first reaction if oligomers are desired.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Response to Arguments

Applicant's arguments filed 3/29/08 have been fully considered but they are not persuasive.

The argument that MPEP 822.01 instructs the examiner to withdraw the provisional rejection if it is the only issue remaining in the earlier filed case is not persuasive since according to MPEP 822.01, the withdrawing of the only provisional rejection is made only after each of application already has a **complete** examination. Until now, the conflicting application 11/521,460 does not have a complete examination yet. Therefore, the provisional obviousness-type double patenting rejection is maintained.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
